# **Professional Summary:**

Experienced Data Scientist and IT Business Analyst with over 6 years of expertise in data analysis, AI model development, and business intelligence solutions. Skilled in transforming complex datasets into actionable insights to drive strategic decisions. Adept at leading cross-functional teams and implementing innovative AI-driven solutions to enhance business operations. Strong technical background with a proven track record in building scalable data models, deploying AI solutions, and delivering business value.

# **Professional Experience:**

## Cloud Solutions | IT Business Analyst | Product Owner | September 2023 – Present | Riyadh

- Gathered and organized business requirements, producing over 1,200 pages of documentation to streamline project workflows.
- Developed and managed over 100 Power BI dashboards, empowering data-driven decisions.
- Improved project delivery time by 70% through optimized documentation and requirements gathering.
- Led the development and implementation of performance reports using advanced analytics.
- Designed and implemented a Business Analyst training program to enhance team efficiency.

### Pixelated | IT Senior Business Analyst & BI Developer | January 2021 – September 2023 | Amman

- Improved data accuracy and consistency in reporting by implementing standardized documentation practices.
- Conducted regular workshops for stakeholders, promoting a data-driven culture.
- Designed and delivered business intelligence (BI) solutions to meet organizational objectives.
- Developed models and analysis that supported business decision-making.
- Trained and mentored team members on BI tools and best practices.

### Council of Engineers Association | Data Scientist (Contract) | July 2020 – January 2021 | Amman

- Developed predictive models using machine learning to support key engineering projects.
- Created visualizations and dashboards to simplify complex data and improve decision-making.
- Authored technical documentation to ensure reproducibility and knowledge sharing across teams.
- Collaborated with engineering teams to provide data-driven solutions to technical challenges.
- Provided strategic consultation on data analysis for complex engineering initiatives.

### **Digital Cash | Software Data Scientist | June 2019 – July 2020 | Amman**

- Built and deployed RESTful services applications using Spring Boot.
- Developed data pipelines to handle large datasets, optimizing data flow and integration.
- Extracted actionable insights from application data to support business objectives.
- Implemented AI-driven solutions to enhance data accuracy and reporting.
- Led the integration of data systems for more efficient business operations.

#### **Education:**

# National University of Malaysia | Master's in Computing (Artificial Intelligence)

Malaysia | Expected Graduation 2025 | Research in AI applications in personalized oncology, predicting cancer treatment outcomes and drug responsiveness.

**University of Jordan | Bachelor's in Computer Engineering |** Amman, Jordan | 2020 | Graduation Project: Development of Virtue, a mental health application using AI.

### **Certifications:**

- NVIDIA Accelerated Data Science | March 2023 | Online
- Databricks Certified Data Engineer | June 2023 | Online
- **AWS Solutions Architect** | October 2023 | Online
- **Professional Scrum Master Scrum.Org** | January 2024 | Online

- **Tableau Certified Data Analyst** | April 2024 | Online
- Alteryx Designer Expert | November 2024 | Online

# **Projects:**

#### Virtue

Description: An AI-based mental health platform that helps users improve their mental well-being through

personalized tools, secure data management, and a clean user interface.

Role: In charge of tracking team progress.

Project Year: 2022 Project Link: Virtue

### **Hewari: AI-Powered Document Builder**

Description: An innovative AI-powered document builder to boost productivity and manage business analysis.

Role: Built the project from scratch with advanced AI techniques and libraries.

Project Year: 2024 Project Link: Hewari

#### **Yadree**

Description: A comprehensive AI-powered business intelligence solution integrating real-time data

visualization, SQLFlow, and machine learning to enhance decision-making.

Role: Developed the full-stack application and its AI functionality.

Project Year: 2024 Project Link: Yadree

### **Pixify**

Description: An innovative AI-powered financial eCommerce platform designed for flexibility and user-specific

customization.

Role: Responsible for the AI model and quality assurance of the algorithm.

Project Year: 2023 Project Link: <u>Pixilated</u>

#### **Professional Memberships:**

- Council of Engineers | Associate Member | 2020
- **IEEE** | Associate Member | 2017

## **Skills:**

- Personal Skills: Effective communication | Leadership | Critical thinking | Problem-solving | Teamwork |
  Strategic thinking | Adaptability | Organizational skills | Time management | Negotiation skills | Presentation skills |
  Project management
- **Professional Skills:** Data analysis | Predictive model development | Business strategy | Business requirements gathering | Data-driven decision making | Market analysis | Stakeholder communication | Change management | Performance management | Technical consulting | Process optimization | Documentation writing
- **Technical Skills:** Python | Big Data tools | Hadoop | BI Tools | Power BI | SQL | Tableau | Spark | Microsoft Power Platforms | RESTful API | Spring Boot | AI and Machine Learning
